SUMMARY

Full-Stack Developer with hands-on experience shipping 5 live production applications using MERN, Next.js, and DevOps. Skilled in multi-agent LLM systems, REST API design, and Docker with a strong foundation in DSA and system design.

EDUCATION

D.Y. Patil College of Engineering and Technology, Kolhapur Bachelor of Technology - Computer Science and Engineering, GPA: 8.01/10 Kolhapur, India	Sep 2023 – June 2026
Government Polytechnic, Miraj Diploma - Computer Engineering, 82.74% Miraj, India	Jun 2020 – May 2023

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Redux, React Router
Backend: Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, RBAC, Socket.io, WebRTC
Databases: MongoDB, MySQL, PostgreSQL, Firebase, Neon, Supabase
DevOps & Tools: Docker, Containerization, Git, GitHub, GitHub Actions, CI/CD, AWS, Linux, Vite, Postman, Vercel, Render

EXPERIENCE

Full Stack Developer Intern Softcadd Technologies, Pune - Developed and optimized production-ready frontend and backend modules using React.js, Node.js, TypeScript, Tailwind CSS, and Supabase across 5 live production applications including a multi-role job search platform serving 150+ active users. - Implemented RBAC and JWT-based authentication flows, integrated third-party APIs, and resolved production-level frontend and backend issues across 5 live applications in an Agile development environment.	Jan 2026 – Present
Software Developer Collab Vision Infosolutions, Kolhapur Developed and contributed to real-world Web and Android applications, implementing features, integrating APIs, and improving application performance, reliability, and user experience.	Jun 2025 – Aug 2025

PROJECTS

SkillPulse.ai Next.js, TypeScript, Groq, LangChain, LangGraph, Prisma, PostgreSQL, GraphQL, CI/CD, Docker Live GitHub - Engineered a multi-agent system using LangChain and LangGraph — Resume Analyzer for skill-gap analysis across 30+ resumes, Mock Interview Agent for role-specific simulation, and Learning Agent for personalized learning plan generation. - Built a gamified learning dashboard serving 20+ AI-generated roadmaps via GraphQL APIs, where users progress through XP, streak, goal tracking, contextual Q&A, and adaptive quiz tests, with learning plans persisted in PostgreSQL via Prisma ORM. - Developed a streaming AI assistant with context-window management delivering sub-500ms average response time, enabling real-time concept explanations and session-aware Q&A within active learning sessions.
HealthSchedule MERN Stack, AI Calling Agent, WebRTC, PeerJS, Vercel, Render, CI/CD, Docker Live GitHub - Built a multi-hospital appointment booking platform with AI calling automation, real-time patient scheduling, and role-based access control (RBAC) for admin and doctor roles. - Implemented real-time WebRTC + PeerJS video teleconsultation infrastructure and a doctor-facing dashboard for appointment management and digital e-prescription delivery, ensuring low-latency communication across hospital workflows. - Containerized the full-stack application with Docker and automated deployments via GitHub Actions CI/CD pipeline to Vercel and Render, enabling reproducible and scalable production builds.
StudentGPT – Academic AI Assistant Next.js, TypeScript, Groq, pdf-parse, LLM, RAG, Neon, PostgreSQL Live GitHub - Built an AI-powered assistant adopted by 10+ students, resolving queries on attendance, timetable and syllabus documents. - Implemented a Retrieval-Augmented Generation (RAG) pipeline ingesting 20+ college documents (PDF/DOCX/MD) with vector-based retrieval, enabling document-grounded, context-aware responses tied strictly to source content.

CERTIFICATIONS & ACHIEVEMENTS

- Secured 2nd Rank in the Pratham Code Zonal-Level Competition held at DYP CET. [Link](#)
- Solved 350+ DSA problems on LeetCode and 100+ on GeeksforGeeks while participating in coding contests. [Link](#)
- Successfully completed GeeksforGeeks 160 Days of Problem Solving. [Link](#)
- Completed AWS Cloud Technical Essentials and Agentic AI with LangChain & LangGraph (Coursera). [Link](#)
